

OVER 115 RESEARCH PROJECTS

Research is one of our pillars. At Kimatec Agro and Kimatec Group, we currently have over 115 projects underway, of which 15 are funded by different entities, the rest are self-financed. We also have 4 patents.

In total, we have **invested over 20,000,000 € in R & D** since 2013. We hope to continue increasing these figures.

PROJECT INFO SHEET

BIOPOLIM-A

Development of agricultural film with biocidal activity derived from food subproducts

BIOPOLIM-A

PROJECT DESCRIPTION

Provide high added value to agricultural waste (lignocellulosic biomass), solid urban waste (organic fraction), agro-industrial waste (whey), and Andalusian horticultural waste, transforming them into biomaterials such as bioplastics.

Call:

CDTI INNERCONECTA

Dates:

Start: april 2013
End: december 2015

Project Budget:

324.252€

OBJECTIVES

a. To open new project lines in terms of the recycling, reusing and recovering of agricultural waste and associated industrial activities found mainly in the food industry.

b. To obtain biopolymers from lactic acid to produce an agricultural film with biocidal activity.

Participants:

ABENGOA

ABENGOA BIOENERGIA
NUEVAS TECNOLOGIAS
